at Penn State. Designing an advisory
management system called PennPal.

Girls Who Code
Teaching High School girls programming
in Python.

Consulting Services
Analyzing and providing solutions to local
clients to improve UX on their websites.

OBJECTIVE

Instinctive professional motivated to drive projects from inception to positive results as a part of a dynamic team. Enjoy participating in planning, analysis and implementation of solutions supporting strategic business objectives.

WORK EXPERIENCE

Learning Design Office, Eberly College of Science, PA
Project Management Intern Nov 17 - Present
• Created an interactive Master's level content online course for Fall curriculum. Prototyped in Adobe Creative Cloud with graphic designers adhering to client requirements.
• Followed the SDLC model to rework existing Drupal server hosted websites by replacing outdated Flash usage to custom HTML support with seamless integration.
• Creating a reusable graphical data visualization web component using D3.js and polymer library for web designers (in development - <https://haxtheweb.org>).
• Assured QA support for all projects through detailed UML diagrams, use case descriptions and first level troubleshooting for the clients.

Learning Assistant (<https://learning.ist.psu.edu/govind-nitya>)
Project Management Course Aug 18 - Present
• Mentoring 15 student groups in managing a commercial EY Project based on Risk Management and IT Infrastructure.

Consolidated Contractors Company, Dubai, UAE
Project Management Intern May 16 - July 16
• Created a documentation source for resolving requests on Employee Payroll verification.
• Coded and executed SQL queries for data validation; documented most common use case queries.

ACHIEVEMENTS

Google and PSU AI Hackathon Winner Oct 04
Created an automated chatbot using AI to streamline the advising process at Universities. (<https://bit.ly/2zSehgM>)

PROJECTS

Geico app development Aug 18
• Currently developing a UX map and prototype for Geico Mobile and Web Application.
• As a SCRUM master, managing delegation, communication and tracking blockers.

Database modelling Jan 18
• Performed analysis of Netflix's model leveraging AWS.
• Architected Netflix's database in MySQL, starting from E-R diagrams, relational schemas to organization.
• Validated with extensive user scenarios.

Analysis of Commercial Ernst & Young Project Aug 17
• Project Manager for a banking domain case provided by EY.
• Assessed the areas of risk, developed and documented functional/non-functional requirements, created a risk assessment visualization tool in MS Excel and translated results to the client using waterfall methodology.
